

GROUP 3 : TETRAPUS

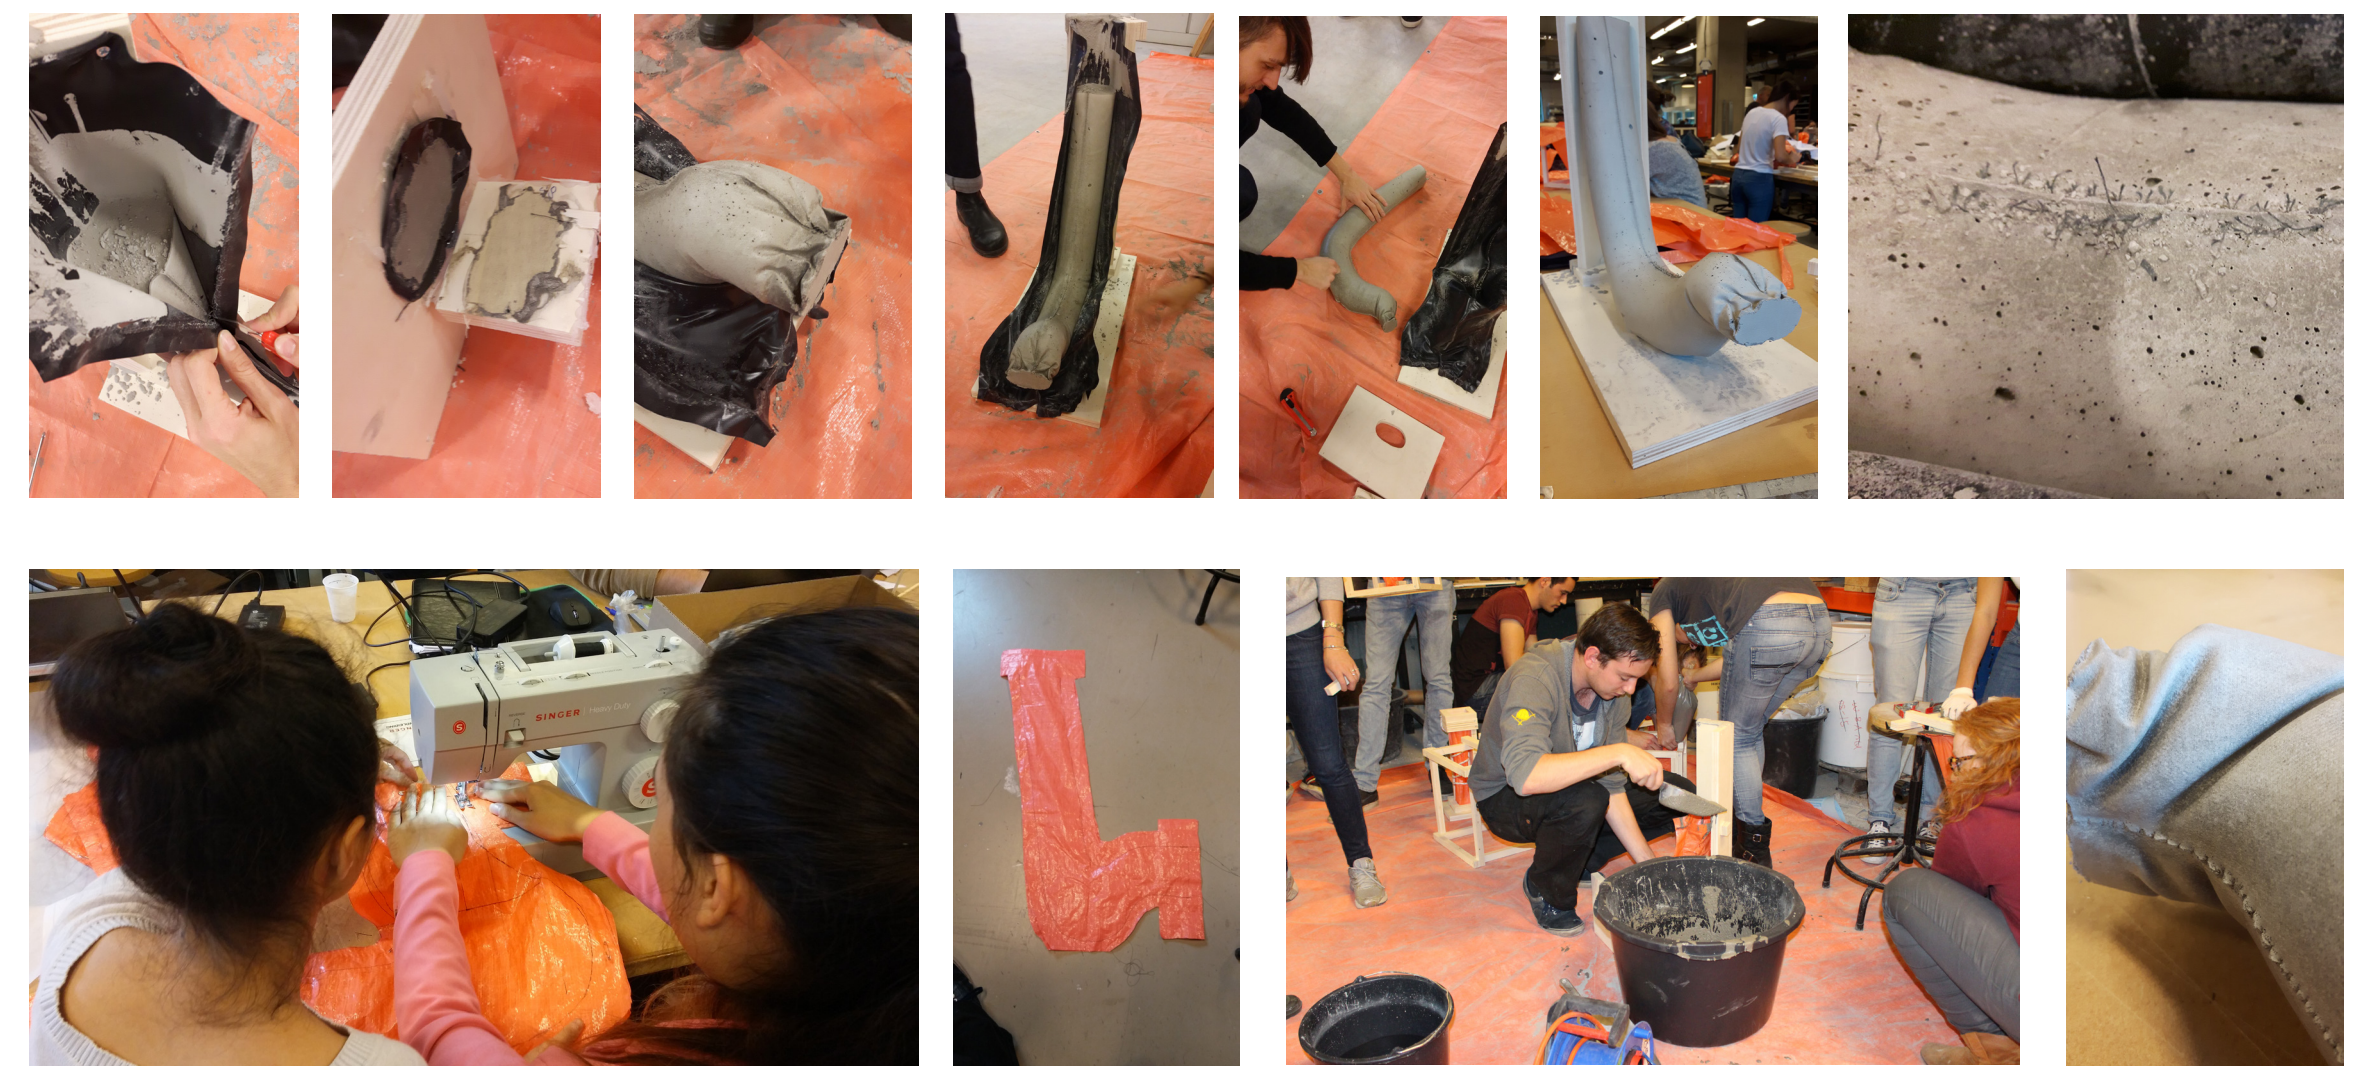

'Tetrapus' is an experiment of the possibilities of organic forms of concrete using fabric formwork. Four slanted columns touch the ground as they curve upwards and are then joined in the centre by a 'floating' element.

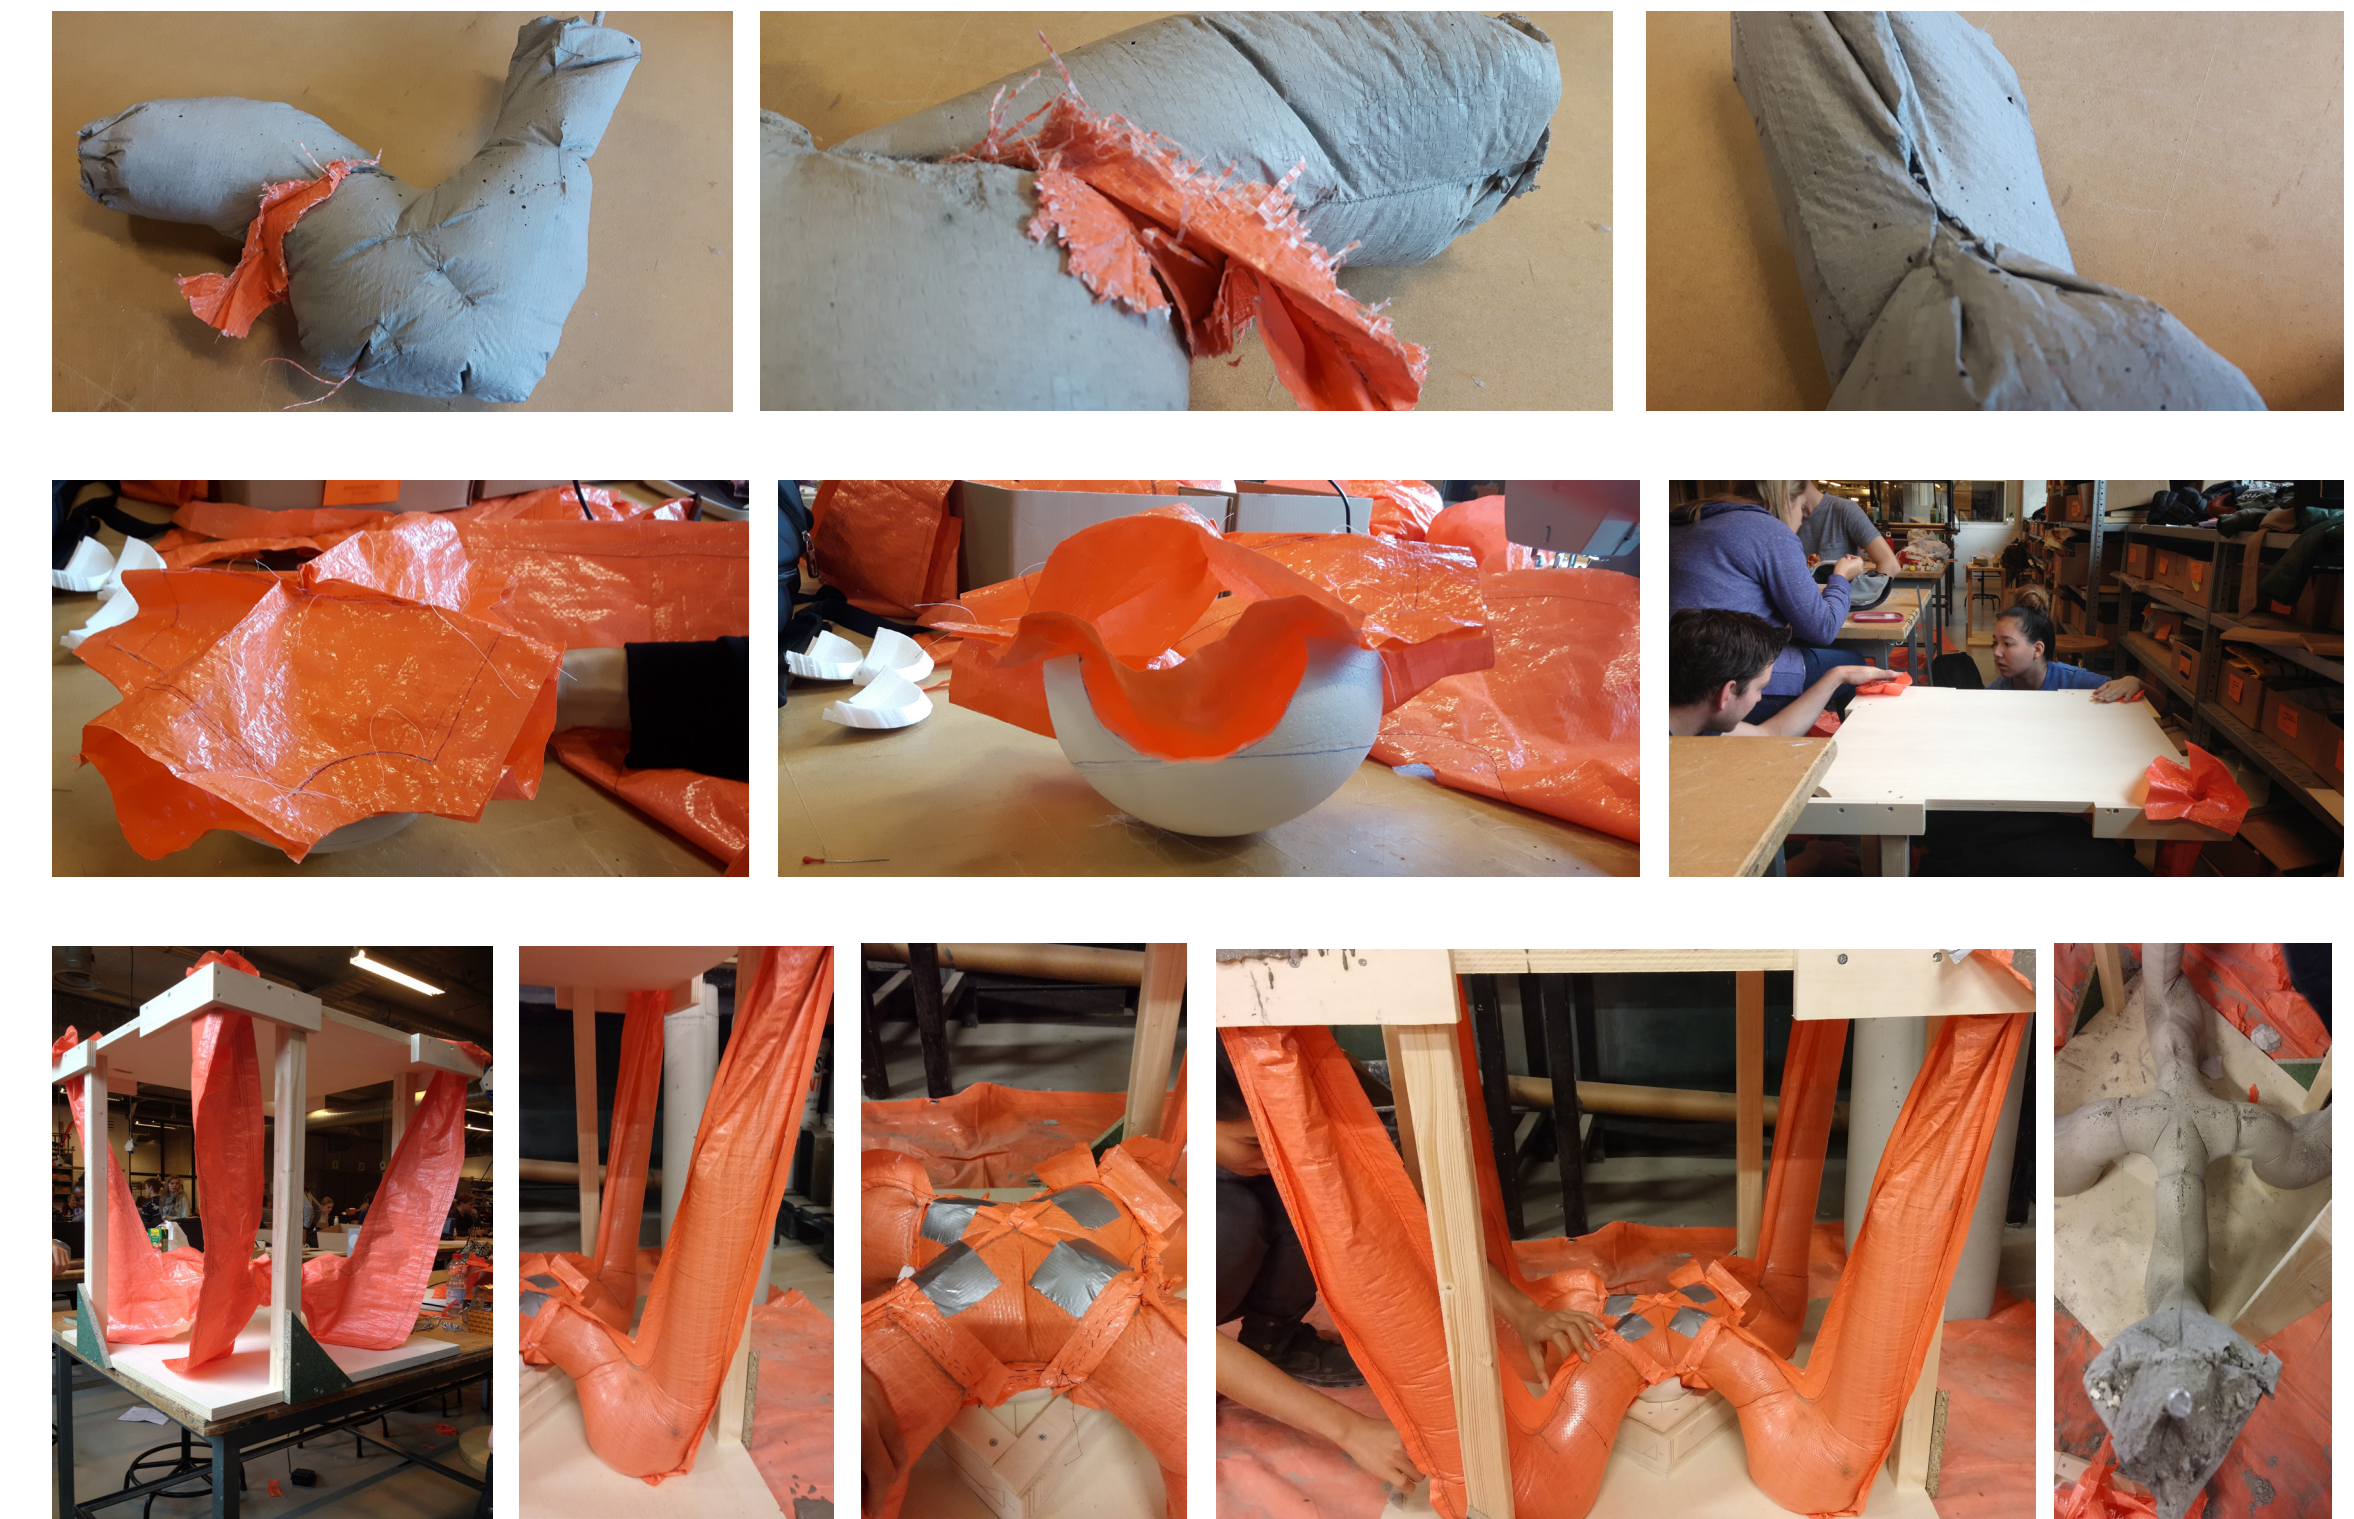

DAY ONE : Concept & Feasibility Test

DAY TWO: Final model formwork & Texture Test

FINAL DAY : Final model Casting

Matteo Basso, Mark van Benthem,,Josie How Hong Jin, Lia de Mooij, Ezra Schröder
